

ez-Wheel's pusher/puller makes any load handling easier in the food processing industry. Fully compliant to [DIN9797](#) (food) standards, it concerns:

- stainless-steel tanks
- stainless-steel tubs
- ...

**Stainless Steel**

**IP 65**  
WATERPROOF

### Application/Mission

The ez-wheel pusher/puller has been designed to facilitate the transport of containers and stainless-steel tanks used within the food production.

### Performance

The pusher/puller is designed for an indoor use, over a wide temperature range. It offers optimal conditions of handling and stability allowing the safe transport of loads up to 400 kgs.

### Construction

The pusher/puller is made of high quality stainless-steel (316L) and can operate in severe environments. It features a state-of-the-art drive system with wireless control between the command and the drive wheel, removing all wires and electric connections from the chassis and offering a zero-maintenance system.

### Main specifications

Max. load	400 kg
Max. speed	6 km/h
Autonomy (number of starts)	500-1000
Recharge time (with AC adapter)	6 hours
IP index (except command)	IP 65

### Low position ("unlocked"):

The low position (or "unlocked" position) allows the fork insertion under the stainless steel tank.

### Foot pedal lift:

A pressure on the foot pedal lifts the fork, making the loading/unloading process very simple.

### High position ("locked"):

The high position (or "locked" position) of the pusher/puller ensures a safe and easy transportation.
